Where have you been Financial collapse is happening in every other shithole country but the U.S. Thanks to Trump we're energy independent and have become a net exporter of oil most of the world has negative interest rates and is Hoarding U.S. $100 as we're the only ones above water.

Yah the USD is gonna tank but not before every other shitcurrency tanks first. Donald trump knows this.

Bringing around the Iranian Muslims to delimit their claims on future human labor via oil sales in US dollars, thus lifting the value of the assets those dollars lay claim to, would only kick the can down the road another year, at current spend rates.

The Central bank of Iran should be transitioned to the Shekel. Also oil for combustion is bad for the atmosphere and thus the sulpher dioxide, nitrous oxides and other toxic substances should be reduced.

So this really is a small deal in the grand scheme of things. We're talking a shot in the arm of 5% of global oil sales.

Better than nothing I guess. Nom.

US oil consumption per day is 20 million barrels. US oil production per day is 17 million. The 3 million barrel per day deficit is imported.
There's a difference between energy independence and oil independence. You can burn coal and use solar panels to get energy.

You can't fuel or lubricate your vehicles on land or in the air with coal or solar panels.

Not being able to import 3 million barrels a day = recession.

This " we are oil independent" meme is Zionists propaganda to counter that rapidly public fact that all your wars are an effort to prop up the petrodollar and control the worlds oil supply.

People say the US is a net energy exporter not a net oil exporter.
You only need to convert a tiny bit of the infrastructure that needs oil, to use gas which the US has a yuge supply of due to fracking.

Look over the atlantic and poor old Germany has been forced to make itself Russias bitch in order to get a fraction of the gas that the US got simply by implementing modern fracking technology.

Sure it can be done, but you will have a recession in the meantime.

But the real deal is that the dollar has the value it has because its the currency the world deals oil in.

What would a dollar be worth if China's Petroyuan is launched as an alternative following a US loss of control over most of the oil in the middle east?

Half the value? A third? Can you imagine seeing the money you have been saving for pension all your life loose 70% of its value over night.

Lots of currencies are over valued in my opinion. Including the pound and the Euro.

Lowering your currency value will produce winners and losers:
Richfags with fat bank accounts will find their money buys them less fancy holidays and luxury goods.
But someone who might be looking for a job will find more manufacturing and export jobs due to the more compettitive currency value.

I dont think the petroyuan will be very successful. It will only be adopted by countries that are forced to due to their relationship with China.
The Chinese directly manipulate their currency far more than any other country. And particularly at teh moment as their economy is in serious trouble. Nobody wants to buy in to that.

Which is why this is a moment where China might decide backing Iran and propping up the Yuan for the next 30 years might be the right move.

It has nothing to do with China...It can be togoland ...New rules of the game. Who ever sells the most goods..prices oil in that currency! The age of muhhhhh loook at muhhh big aircraft carriers is over!

We lost the game! We were called to total war and we backed out! China is now the world's manufacturing hub and sells the most goods and has an army with credible deterrence just like the USA...you are equal now! get it!

If you are the sheriff in town and you back away from a low life street thug with no (nuclear) gun then you have no business being sheriff? what part of this simple logic dont you understand burger?

You are a cop with a gun? You got punched in the face....and you ran. Burgers and jews lost everything over the last couple of weeks! 2020 is going to be wild wild wild!

USA lost everything! Why do you think TESLA is $500 now....valued more than any other car maker in the world?

Who is paying $500 for TESLA stock now! Burger pension / retirement funds and eurofag pension / retirement funds!

The raid is going on as we speak as ((((Elon Musk and his buddies)))) sell their useless stock to pension funds.

TOTAL WAR WAS DECLARED AND BURGERS GOT THEIR BLUFF CALLED!

In the world of geopolitical porno....those pictures of american bases being bombed accurately in utter ruin is the equivalent of a facialabuse / ghetto gagger porno whore!

We cannot DEFEND ANYTHING WITHOUT LOSING EVERYTHING!

Airforce out dated! Low cost cheap precision guided ballistic missiles will wipe out every US base, Israel and Saudi Arabia within the first wave of burger bombers hitting Iran's borders!

They may be forced in to this deal because they have no other choice. But still its a very risky move though because the Chinese government can do whatever they want to manipulate their own economy and you dont know what they will do in the future.

We are talking about a country where the people cant even transfer money overseas. So the rich ones all fly to Hong Kong with big suitcases full of cash to smuggle it out of the country. Its not a reliable or normal place to do business.

There is a reason why the people of China prefer to invest outside of China whenever possible.

Yes everybody's currency is now a petro currency which means no one is special only the country that sells most goods son!

And this China. The crash is right around the corner if Iran fucks around and US cannot respond a second time!

They know it, we know it! The closing of the strait of hormuz and showing the USA is powerless to wage war is the ULTIMATE REVENGE for the army of salami!

If your bases cant be defended and your navy wont wage TOTAL WAR.....you will be asked to leave and all the sunni states will collapse overnight! There is nothing if you cannot even bomb their oil fields like the 90s.

You cant even do that anymore! USA is no longer alpha and UK is just a poodle. Israel will be forced to negotiate with IRAN just to exist!

TOTAL WAR or everything is lost now! That is why drumpf and our closest ally fucked up on gigantic scale!

The biblical revelation of our time...the apocalypse is that the USA IS NOT A POWER! ASIA or rather CHYNA got the world handed to them on a platter and they did not even ask for it!!!!!

Israel and USA will have to wage TOTAL WAR with IRAN now!
you were called to TOTAL war and you backed out! So there is no nuclear 3rd world war!

just the biggest financial crash of our lifetime with ZERO recovery prospects.

THE PURPOSE OF $2 TRILLION army is to preserve the petrodollar and that did not happen!

Or get India to make them.

Pajeet poo land does not have logistics, infrastrucure etc because they are not into strategy and thinking...even though they are in the most crucial waterways of the world straddling ASIA and Europe...they do not have massive ports, container handling facilites or manufacturing base!

They are a land of white skin worshipping brahmin poos who are going to become irrelevant when they realize their dollar holdings is going to be useless to buy oil from IRAN controlled middle east before 2020 ends!

All the dollar holders of the world will still want energy! China gets it for free from Iran controlled middle east. US now has to sell its own oil to pay back bond holders!

Which means the price of oil is going to rise in the USA thereby cost of living which means depression and doom!

There is no way out! TOTAL war or 3rd world status...because there are just so much US treasuries held by foreign 3rd world countries...they will demand oil for dollars but IRAN will say I need a lot more dollars or I wont accept dollars! So USA has to find that oil...and that means selling domestically produced energy to pay debtors!

/pol/ and /biz/ have no clue what has happened!

WE LOST EVERYTHING! The world still runs on oil! There is no magic energy supply that replaces oil! If you cant price oil in dollars...a whole bunch of angry countries are going to come knocking on the US FED door?

Then what happens? Total shit show...you will lose all respect and status because you are no longer a power in the middle east!

There is no way out. Checkmate! TOTAL WAR or GTFO the middle east = no petrodollar!
